Agenda

Agenda

- Exam topics, areas and new updates
- Examples of exam points, how to prepare and cover them for the exam
- Azure DevOps CLI
- Migrating source code
- Git
- Git Branch and Merge Strategy
- Security/Whitesource
- Azure Pipelines Project agent pool vs. organization agent pool
- Azure Pipeline Agent (Service VS. Interactive)
- Tips, tricks and advices

Exam Topics and Areas

Current

1. Design a DevOps strategy (20-25%)
2. Implement DevOps development processes (20-25%)
3. Implement continuous integration (10-15%)
4. Implement continuous delivery (10-15%)
5. Implement dependency management (5-10%)
6. Implement application infrastructure (15-20%)
7. Implement continuous feedback (10-15%)

New (after June 15,2020)

1. Develop an Instrumentation Strategy (5-10%)
2. Develop a Site Reliability Engineering (SRE) strategy (5-10%)
3. Develop a security and compliance plan (10-15%)
4. Manage source control (10-15%)
5. Facilitate communication and collaboration (10-15%)
6. Define and implement continuous integration (20-25%)
7. Define and implement a continuous delivery and release management strategy (10-15%)

6. Define and implement continuous integration (20-25%)
7. Define and implement a continuous delivery and release management strategy (10-15%)

(60 : 70)%

Examples of exam points and how to prepare for them

Azure DevOps CLI

- Working with az devops CLI it enables automate everything as you can script anything and hook it in a build pipeline.
- az devops project create
- Az boards work-items create
- az devops work item show -id 2222
- az devops Configure
- az devops Configure -defaults

Migrating source code

- TFVC to Git
- Git to Git

Git

- Commit
- Branch
- HEAD
- Merge Non Fast-Forward (Non FF)
- Rebase or Fast-Forward Merge (FF)
- Squash
- Clone
- Remote
- Etc

Git Branch and Merge Strategy

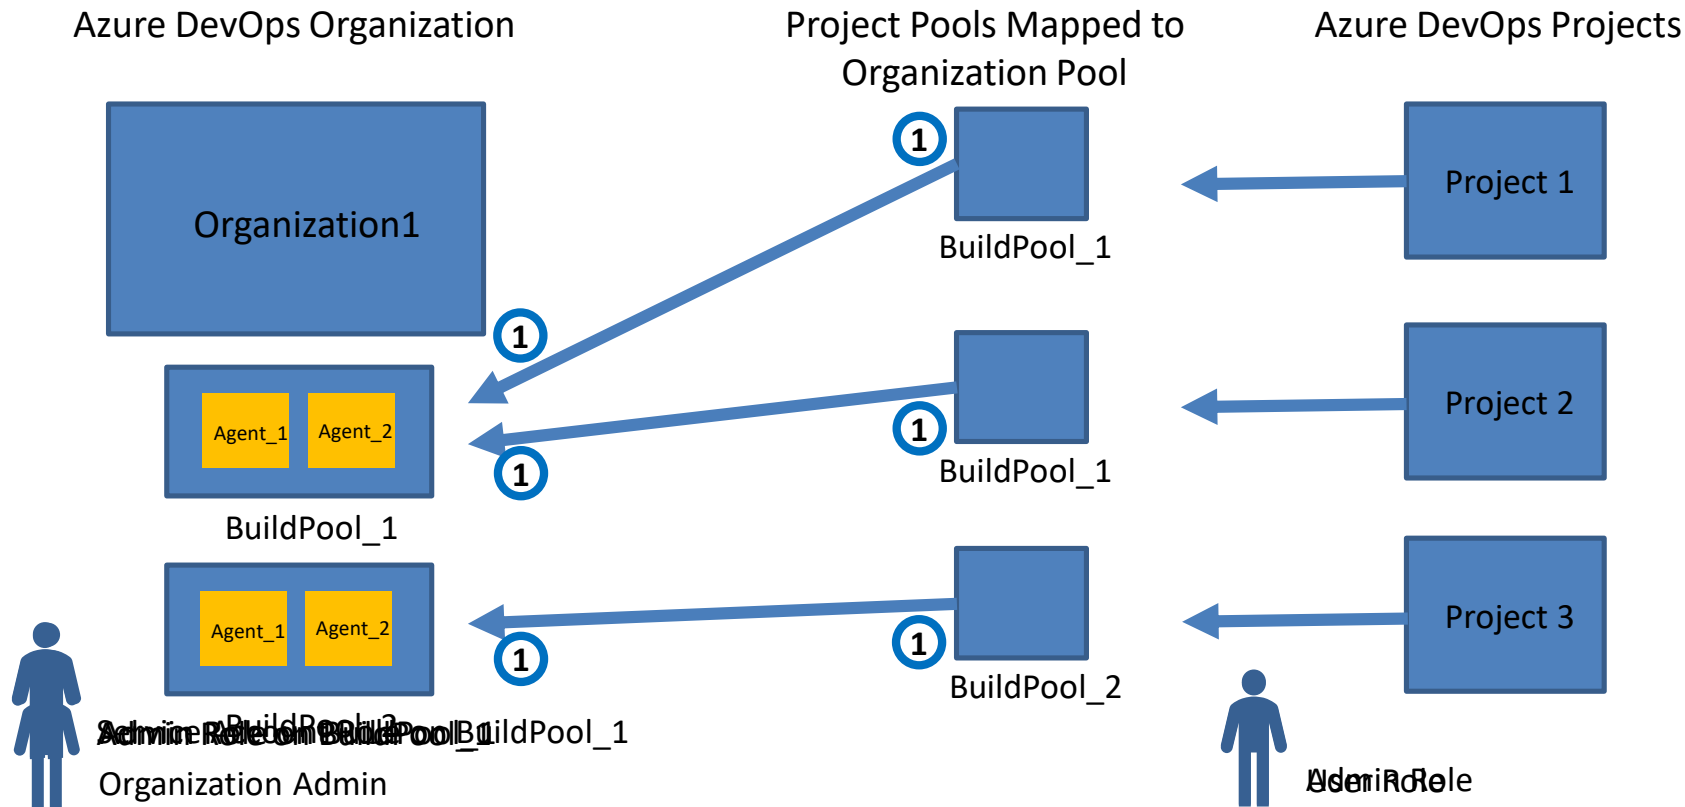

- Gitflow
- Release flow

Security

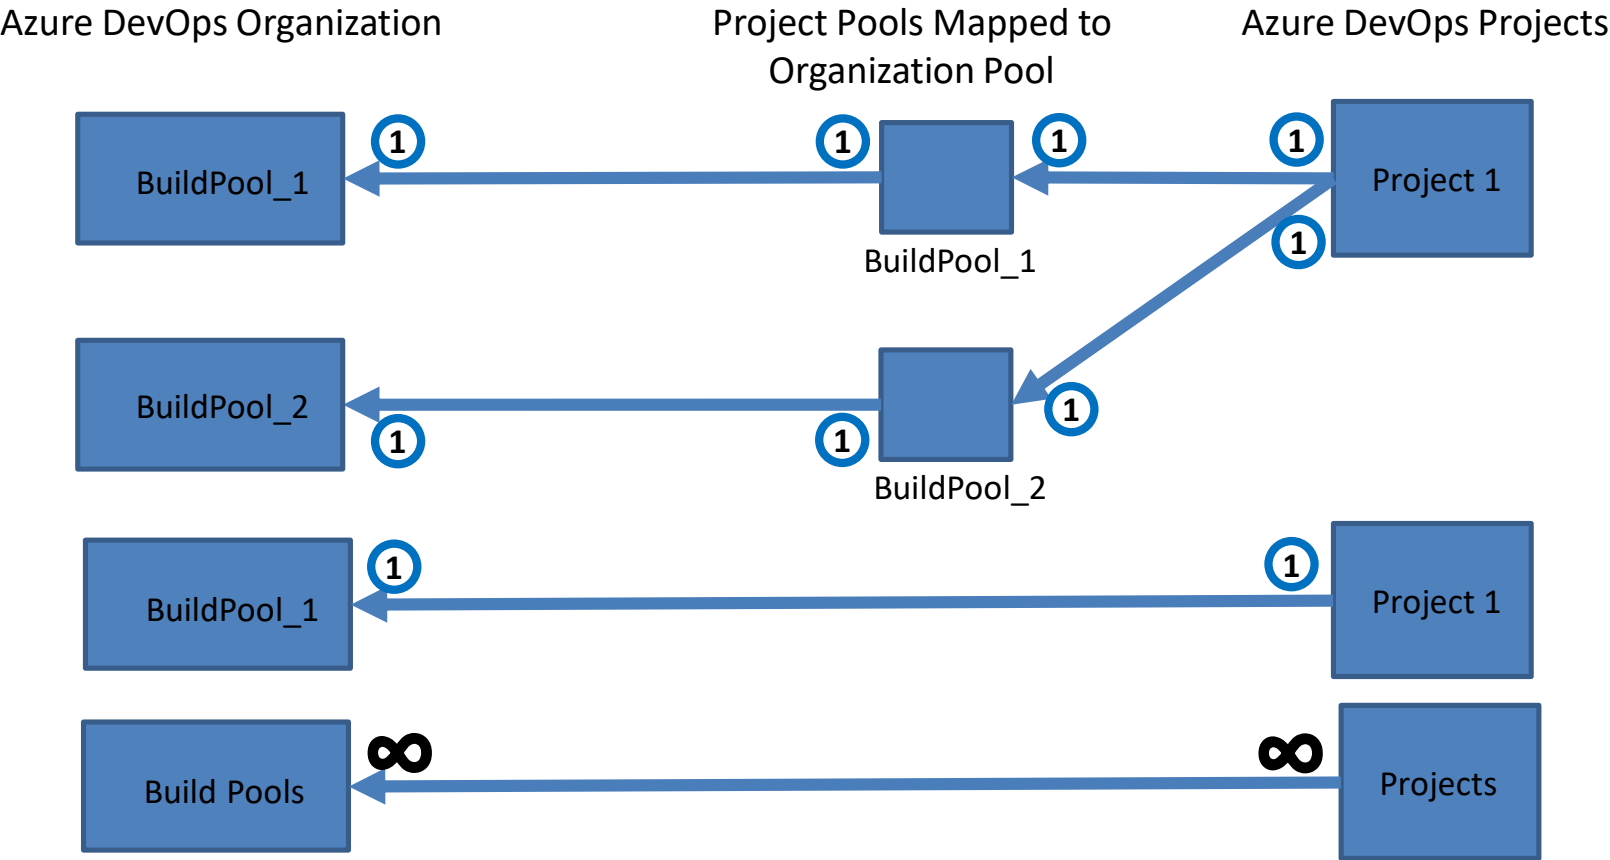

- Whitesource for Open source library vulnerabilities and license

Azure Pipelines Project agent pool vs.
organization agent pool

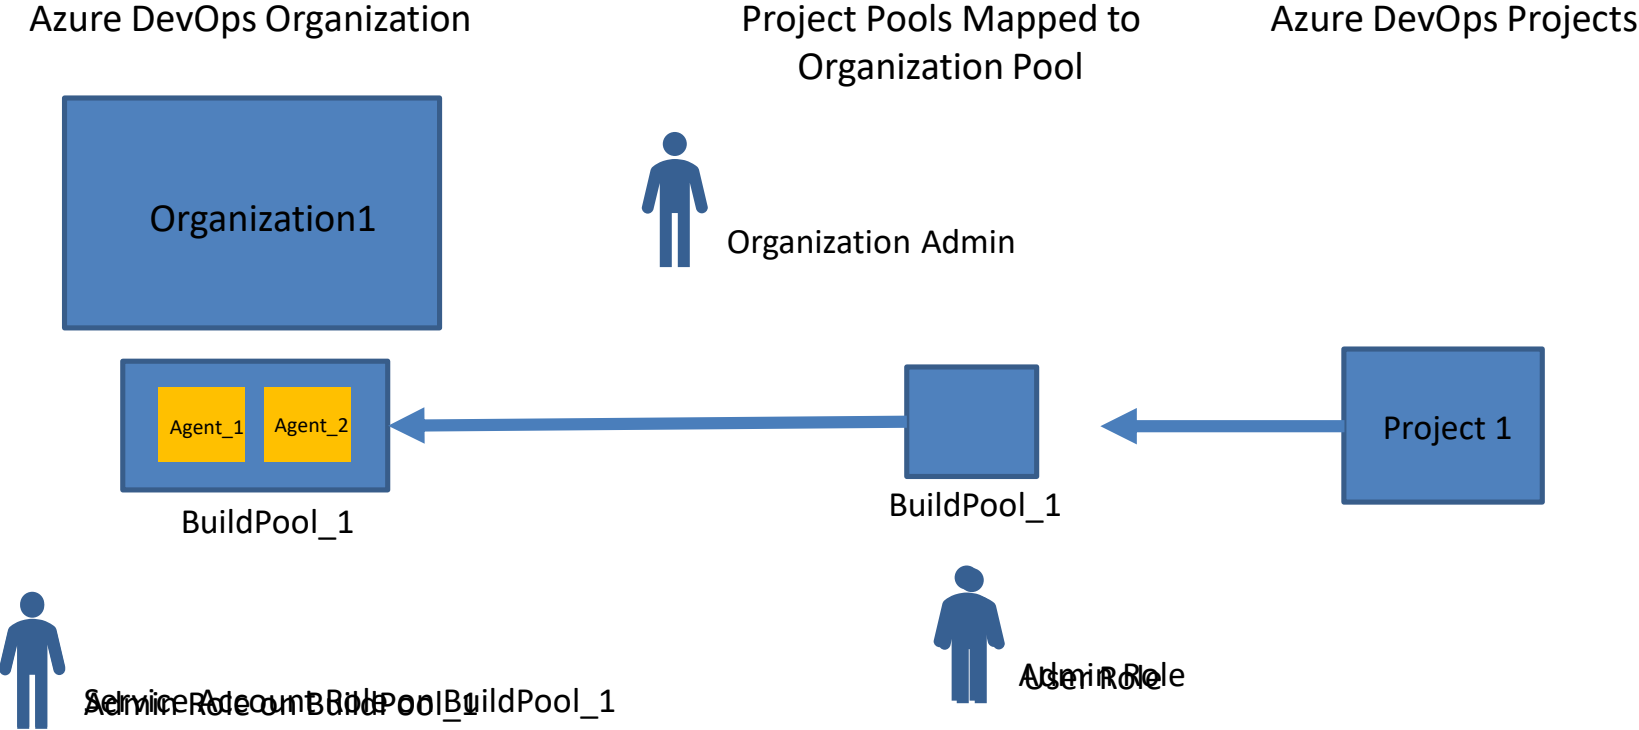

Organization Agent Pool VS. Project Agent Pool

Relation Between Project, Project Agent Pool & Organization Agent Pool

Delegating Organization Pool Admin to Project Admin

Roles and Permissions (Organization Agent Pool VS. Project Agent Pool)

Organization Pool

Service Account Role

Create Project Pool That Maps to This
Organization Pool
Install/Remove Agent

Project Pool

Admin Role

Use Agent Pool for Build
Manage Membership (Add/Remove) Users

Azure Pipeline Agent (Service VS. Interactive)

Service

- It used for build that doesn't require run UI automation (interactive)
- Runs and appears in Windows Services Management
- The Service login using independent account from the user account login to the machine
- The service automatically starts with the machine
- The service has a recovery mode if it is crashed

Interactive

- The process used for build that required run UI automation (interactive)
- It can also run none interactive build
- Doesn't runs nor appear in Windows Services Management
- It appears in the task management as a process
- The process login using the same account login to the machine
- The process needs to be started manually
